

NATIONAL BIOMETHANE SUMMIT

SACRAMENTO, JUNE 23, 2009

NATIONAL
BIOMETHANE
SUMMIT
SACRAMENTO
JUNE 23, 2009

3015 Main Street, Suite 300 | Santa Monica, CA 90405 | P: 800.993.0302 | Fax: 310.396.3696 | www.biomethanesummit.com

CALENDAR LISTING

Topics: Community Events, Conferences, Biomethane, Landfill Gas, Wastewater Treatment, Dairy Methane Recovery, Environment, Clean Air, Alternative Fuel Vehicles

WHAT: This innovative and ground-breaking summit will showcase the availability and potential of Biomethane as a source of low carbon fuel for transportation and power generation. As a new event within the Low Carbon Fuels Conference Series, the National Biomethane Summit will offer a full day's focus on applications, equipment, and emerging technologies in the sciences of Landfill Gas, Dairy Waste Methane Recovery, and Wastewater Treatment.

WHEN: Tuesday, June 23, 2009

WHERE: Sacramento Grand Hotel, 1230" J" St, Sacramento, CA 95814, (916) 447-1700

WHY: The goal of the National Biomethane Summit is to showcase fuels and technologies, policies and actions, and other ongoing efforts that will enable California to meet its goals to reduce Greenhouse Gas emissions, strengthen transportation fuel supplies, and establish a long-term sustainable market for cleaner-burning fuels. The conference also aims to further educate those working on new plans, policies and programs for the implementation of AB32 and the increased use of alternative low carbon fuels. In order that the most effective and successful plans, policies and programs are developed, we believe it is imperative that the legislatures and staff are aware and have the most current and best information on these subjects and providing this information is another key focus of this conference.

WHO: This event is designed for those interested in the research and application of Biomethane. The event is also designed for government agencies, funding agencies, community groups and organizations interested in finding solutions that promote and yield clean, renewable sources of energy. Local, state and federal elected officials and representatives will also be in attendance to learn about the positive environmental impacts of this new and emerging technology and to understand how to best plan for and promote the future growth of the industry. Expected attendees include:

- Industrial end-users
- Distribution facility operators
- Funding providers
- Elected officials
- Technology providers
- Educators, researchers, and engineers
- Regional transportation planners
- Non-governmental organizations
- Carbon trading experts
